

Tomas Aparicio

Systems Engineering Student — Córdoba, Argentina

SUMMARY

I am an **advanced Engineering student**. My academic background helps me adapt quickly to **new technologies**, work environments, and challenges.

I enjoy **solving problems**, improving systems, and learning new things. Through personal projects, I've been exploring different areas of **software development** to expand my knowledge and build practical skills.

I am currently looking for **job opportunities** where I can continue learning and growing as a professional.

TOOLSET

Programming Languages

JavaScript

Java

C# (learning)

Databases

PostgreSQL

SQLite

SQL Server

Redis

Stacks & Technologies

Spring

Maven

Node.js

Express

Sequelize

React

HTML

CSS

Other Skills

Linux

Git

Docker

Bash

Assembly

PROJECTS

Real Time Chat

- Full-stack real-time chat application with retro UI.
- Backend: Node.js, Express, Sequelize, SQL Server, JWT auth, Multer.
- Frontend: React, Axios, TailwindCSS, NES.css.
- Architecture: services, repositories, models, routes, middlewares.

Backend Repo | Frontend Repo

Daily Cats

- Displays a new cat GIF every day.
- Node.js, Express, CORS.
- Focused on full-stack integration and fun UX.

Repository

EDUCATION

National Technological University (UTN)

Systems Engineering — 4th Year

LANGUAGES

- Spanish — Native
- English — Intermediate
